DETAILED ACTION

Response to Arguments

Regarding objection to specification provided in the previous office action for failing to provide a descriptive title. Applicant has amended the title of the invention to overcome the objection to the specification.

Regarding objection to drawings provided in the previous office action. Applicant has amended the drawings of the invention to overcome the objection to the drawings.

Regarding various objections/rejections to claims 1 – 9 and 11 - 12 provided in the previous office action. Applicant has canceled claims 1 – 9 and 11 - 12 in turn these objections/rejections are withdrawn.

EXAMINER'S NOTE

The examiner would like to point out that in claim 10 lines 8 – 9 have been added via the amendment but the applicant did not underline this new addition to the claim. For future reference the examiner would like to request that the applicant please markup all changes to the claims via amendments for clarity and to avoid delays in

~~precaution:~~
prosecution.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Regarding claim 10:

In lines 2, 3, 6, 9, and 9 of claim 10 all instances of **"movable element"** have been amended to -- **movable elements**--.

Allowable Subject Matter

Claim 10 is allowed.

The following is an examiner's statement of reasons for allowance: As stated in the previous office action the prior art of record fails to teach or fairly suggest "A camera unit comprising: a plurality of movable element holding a plurality of lenses; a stator supporting the movable element so as to freely move reciprocally along the optical axis of the lens; an image pickup element imaging an image which was image-formed by the lens; a regulating member which regulates movement of the movable element within a movable range thereof; a control unit controlling movement of the movable element in order to detect a position of the movable element by making the movable element abut the regulating member; wherein a first groove portion which is formed along the optical

axis of the lenses and in which a basic end portion thereof is provided at the object side is formed at a first movable element among said plurality of movable elements, and a second groove portion which is formed along the optical axis of the lenses and in which a basic end portion thereof is provided at the image pickup element side is formed at a second movable element among said plurality of movable elements, and **the regulating member has a first member in which a distal end portion thereof is extendedly provided so as to direct toward the object side along the optical axis of the lenses in the stator, and which is not engaged with the first movable element, and in which the distal end portion thereof abuts the basic end portion of the second groove portion, and a second member in which a distal end portion thereof is extendedly provided so as to direct toward the image pickup element side along the optical axis of the lenses in the stator, and which is not engaged with the second movable element, and in which the distal end portion thereof abuts the basic end portion of the first groove portion**".

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
